

Boil Water Advisory

When water systems lose pressure there is an increased risk of contamination. Therefore, if you live in an area that is under a Boil Water Advisory, please follow these tips:

During a Boil Water Advisory

- Boil water for drinking, making ice, washing dishes, brushing teeth and food preparation.
- Water should be brought to a rolling boil for one minute and cooled before using.
- Water for pets should be boiled and then cooled for their use.
- Disinfect dishes by washing them in dishwashing machines that have a dry cycle or a final rise that exceeds 113 degrees F for 20 minutes, 122 degrees F for five minutes or 162 degrees F for one minute.

Frequently Asked Questions During a Boil Water Advisory

Q: What is a Boil Water Advisory?

A: Boil Water Advisory is a recommendation made to residents in a place to only drink tap water if it has been boiled for at least one minute. This recommendation is made to the town to protect the health of its people.

Q: When is a Boil Water Advisory recommended?

A: Boil Water Advisories are recommended when there is known contamination of the water supply OR when there is a risk of contamination in the water supply.

Q: What can I drink during a Boil Water Advisory?

A: You can drink tap water if it has been boiled for one minute. Cool and store all boiled water in a covered container. If you do not wish to boil your water, you may choose to buy commercially packaged water for drinking.

Q: I drank the water before I realized there was a Boil Water Advisory. Am I going to get sick?

A: The Boil Water Advisory has been recommended as a precaution. If you drank the water before hearing of the advisory, your risk of becoming ill is low. However, if you begin to have fever, diarrhea or vomiting you should seek medical attention. Advise your health care practitioner that you have consumed tap water during the Boil Water Advisory.

Q: I have a dishwasher. Is it safe to use during a Boil Water Advisory?

A: If your dishwasher has a hot/sani-cycle then it can be used, it safely disinfects dishes. If it does not have this setting, after the final cycle, soak dishes for 1 minute in a solution of 30ml (1 oz) of bleach mixed with 13.5 liters (3 gallons) of lukewarm water. Let dishes air dry.

Q: Can I use the water for other purposes?

A: You can use the water for bathing as long as you do not drink it. Supervise babies and children during bathing to ensure that they do not drink the water.

Q: *How long is boiled water safe to drink?*

A: As long as the water is protected from contamination, it should remain safe to drink. Once the water has been boiled, cover it and place it in the refrigerator for future consumption.

Q: *Can my pets drink the water?*

A: Pets should be provided boiled water, or water from an alternate source until the boil water advisory is lifted.

Q: *Can I use my coffee maker?*

A: Most residential coffee makers are not capable of maintaining high temperatures for a long enough period of time to make the water safe to drink. Coffee and tea can be made by using water that has been brought to a rolling boil for a period of one minute or bottled water. If using an automatic shut off kettle, make sure the water has boiled for one minute.

Q: *Can I use my activated charcoal filter system (i.e. Brita or other brand names) to treat my water during a Boil Water Advisory?*

A: No. These filters are not designed to remove contamination from an unsafe water supply. If you have run the water through your filter during the Boil Water Advisory it could be contaminated. It is recommended that you discard the filter and replace it with a new one once the Boil Water Advisory is over.

Q: *How do I safely prepare my baby's formula during the Boil Water Advisory?*

A: Sterilize all bottles, rings, utensils and nipples in boiling water for two minutes. The water mixed with the formula should boil at a rolling boil for at least two minutes, this will sterilize the water.

Q: *Should I be concerned if the water is yellow?*

A: No, the color of the water should not affect its safety provided it has been boiled for a period of one minute.
